ArcaForm™

A new comfort revelation for the underwire customer...

With **ArcaForm™** technology that fits like a wire bra but is as comfortable as a non wired bra...

A bra that gives you great support, lift and shape, and moves with you, all without the help of a conventional metal wire...

Incredible support for the non-wired customer, without the need for a wire.

About the Technology

What is ArcaForm?

- ArcaForm is a patented ultra-comfort fabric support system for use in bras which replaces the need for a bra wire

What ArcaForm Does

- This game-changing technology eliminates the use of both the metal and plastic wires to give a softer fit to the body, whilst still supporting the bust in the most comfortable way possible.

How ArcaForm Works

- ArcaForm is engineered incorporating a resin, which binds together the yarns to form a flexible and light weight support system
- ArcaForm hugs the contours of the body providing an ultra comfortable wearing experience.
- ArcaForm technology can be washed and worn like any other bra.

Customer Benefits

- No metal wires against the body, eliminating wire poking through.
- The system moves with your body making it more comfortable
- The bra can potentially be worn for longer periods of time whilst maintaining lasting comfort
- Provides fantastic support without use of a metal wire, for that all day comfort
- Improved the quality and comfort of the garment
