

Dream Satin

Last Modified on 31/10/2023 3:25 pm GMT

DREAM SATIN™

High performance satin with Cool Comfort™ and Cling Resist™ technology

NB. Trademark is currently pending

Why do I want it?

Satin has a reputation for being hot and clingy to wear.

Our modern Dream satin combines a glamorous aesthetic with features and benefits which keep you cool and static free.

How does it work?

The fabric is developed using a combination of technical finishes, which together wick moisture away from the body where it evaporates, cooling and preventing static from forming.

Product details?

Available in sleepwear launching October 20
