NURSING BRAS

Why do I want it?

Bras designed with a drop cup feature to make breast feeding a bit easier and more comfortable.

How does it work?

- With front clips to allow cups to drop, and a built-in sling to support the breast, nursing bras make breast feeding a bit easier and more comfortable.
- All our nursing bras also have 4 rows of hook and eyes, to give extra comfort as the wearer could fluctuate in size after giving birth.
- No wires are used in our nursing bras, as wires could dig into sensitive breast tissue and potentially trap milk ducts.

Product details

- Cotton rich
- Synthetic
- Lace
- Sumptuously soft
